

Polyclean

Hako

Floor cleaning

Product description	Maintenance cleaner for daily cleaning.								
Properties	Low-foaming. Polymer-free cleaner for glossy floors. Suitable for Hako scrubber-driers. Suitable for use on all water-resistant hard floors. Approved for use within the HACCP programme. Hako Polyclean is biodegradable.								
Usage	Hako Polyclean is suitable for daily use on all hard floors and ideal for cleaning both coated and uncoated floors such as linoleum, PVC and natural stones. It can be used for spray cleaning.								
Dilution	5 – 10 ml per 1 litre water (0,5 – 1% / 1:200 – 1:100) Dependent on the degree of soiling. Undiluted when used for spray cleaning.								
Instructions	Depending on the degree of soiling (maintenance cleaning 1:150) dilute Hako Polyclean with water. Clean the surface with Hako scrubber-drier. If the floor is cleaned manually, remove the cleaning solution thoroughly. Micro-fibre and melanin pads are particularly suitable for use on open-pore floor coverings. For spray cleaning apply Polyclean undiluted onto the floor and polish with a red pad using an (ultra) high-speed machine until the desired high-gloss finish is achieved.
